### NoFrost

When you open your freezer, you want to see frozen food – and certainly not ice and frost. NoFrost protects the freezer compartment from unwanted icing, which consumes a lot of energy and can be expensive. NoFrost means no more tedious and time-consuming defrosting of the freezer compartment, more time for other things – and saving money.

### Touch display

Fingertip control: the touch display enables easy and intuitive operation of your Liebherr. All functions are clearly arranged on the display. By gently tapping a finger, for example, you can easily select the functions or check the current temperature of your refrigerator.

### SoftSystem

From breakfast to a midnight snack – a fridge needs to be open and closed on many occasions. And your Liebherr makes this a lot of fun. With the SoftSystem, your fridge door closes softly and safely, and in a way which is pleasantly quiet and light. Bottles stored in the inside door remain securely in place – nothing rattles or wobbles.

### VarioSpace

Want to store a multi-layer ice cream cake safely until the summer party? No problem for your Liebherr freezer: Sometimes you just need more space and it's prepared for just that. With VarioSpace you can remove individual freezer drawers and the horizontal glass dividers below them, and hey presto, you have an extra large storage space.

### SuperSilent

Shhh – listen carefully. Your Liebherr is so quiet that you have to strain your ears to hear it. How is this achieved? All refrigeration components such as compressors, valves, fans and evaporators are optimised and perfectly adapted to one another. This means you only hear what you want to hear in your kitchen.

### Integrated drawer slides

When the freezer drawers are opened and loaded, the integrated drawer slides give you convenient access to your food at all times. The pull-out stop prevents drawers from falling out when opened. On closing, the drawers slide into their final position with ease which ensures ideal air distribution in front of the drawers and therefore the best possible cooling.
