## **LIEBHERR**

Accessories for Truck Mixer generation 05

# Customised truck mixer

With our innovative truck mixer configurator, creating your dream vehicle has never been easier. We have developed a user-friendly platform that allows you to make all the important decisions with ease. Here are some of the outstanding features:

## Simple operation system

Our configurator is easy to use, even for technical amateurs. The intuitive user interface guides you effortlessly through the configuration process.

## Graphical representation

See what your vehicle will look like from all sides in 3D. This way you can ensure that it meets your requirements.

## Payload calculation

Our configurator calculates the payload in real time. Enter the desired drum size to get the payload in cubic metres of concrete straight away.

## Key information indicators

If more extensive options are selected, all of the relevant details are displayed automatically. This way you won't miss any important information, allowing you to make informed decisions.

## Huge range of accessories

Our configurator features an extensive and clearly organised range of accessories. Browse through the various categories and select suitable options.

## Personalised design

You can also use the configurator to customise the vehicle's look. Choose from a variety of colours and designs to ensure that your vehicle reflects your personal preferences.

Select your country for pre-selections, check the range of accessories and save your individual configuration - even without a request.

Configure your vehicle online at:

# Platform solution: Accessories perfectly positioned

With its platform solution, Liebherr enables you to take all your accessories and tools with you in the vehicle in the easiest possible way. The customer has complete flexibility in terms of positioning and is able to react to the driver's individual requirements.

Everything is safely stowed or secured while the vehicle is on the move. This makes day-to-day work easier.

## The Liebherr platform solution

ensures that the driver can work safely and flexibly every day.
