 $<sup>^1\</sup>text{These}$  models are only bound for storing wine. Maximum DIN norm bordeaux bottles capacity (0.75 l) as per norm NF H 35-124 (H: 300.5 mm, Ø 76.1 mm)

### Freestanding WKpb 4612

## **Features**

#### Low-vibration storage

Even slight vibrations can disturb the wine maturing process and prevent the tannins from settling. Specially developed, exceptionally low-vibration compressors in all the wine cabinets mean that the wine is optimally stored.

#### Ideal humidity

Maintaining the proper humidity is an important aspect for the storage of wines. In this way, corks remain supple and do not dry out. Wine should be stored in a horizontal position to keep the corks moist from the inside. With over 50 % air humidity, wine cabinets guarantee the perfect conditions. The air humidity can be controlled as required in the wine storage cabinets by pressing the ventilation button.
