LIEBHERR

Global success: The Liebherr Group.

Liebherr is a third-generation, family-owned company founded in 1949 by Hans Liebherr with his ground-breaking invention of the world's first mobile tower crane.

With over 70 years of success, Liebherr is known as a pioneer in high-quality, breakthrough innovations and countless cutting-edge technologies in numerous industries. One of the world's Largest manufacturers of construction machinery, Liebherr has expanded its broadly diversified portfolio to 13 product segments including earthmoving, deep foundation machines, mobile and crawler cranes, tower cranes, concrete technology, material handling technology, mining, maritime cranes, aerospace and transportation systems, gear technology and automation systems, components, hotel, and refrigeration and freezing. The company currently employs about 49,000 people in more than 140 companies in over 50 countries worldwide.

Liebherr Appliances India Private Limited specialises in the production of high-quality refrigerators and freezers for the Indian market. The new production plant covers an area of 2,02,343 sq. mtr. The ultra-modern and flexible production facilities have a capacity of around 5,00,000 units per year, and can be expanded when necessary.

Portrait of the Liebherr Appliances India

Preserving Freshness Since 1954

We, at Liebherr, understand your need for a refrigerator that you can trust to preserve the freshness in your foods for a longer duration. We also appreciate the importance of providing you with an improved user experience through our products.

That is why we apply our seven decades of expertise to bring you intuitively innovative technologies that keep your food fresh for longer and make handling your refrigerator absolutely effortless.

Hands-Free opening

Refrigerator door opening technology has never seen an intuitive innovation like this before.

This intuitively designed innovative life solution allows one to open a refrigerator door with just a gentle press of a foot, without even using one's hands. It is an industry-first technology, and a game-changer.

The Handsfree Foot Pedal

Press with your feet

Open the door with ease

Lever Handle

Struggles with opening vacuum-sealed refrigerator doors will be a passé with 70% less pull force

Our lever handle mechanism helps operate even the heaviest of doors with 70% lesser force compared to fixed handle doors.

*Comparison made with similar existing models. Results may vary based on individual usage and operating conditions. Terms and Conditions apply.

Lever Handle

Light pull unlocks the hinge

Door swings open effortlessly

Hot to Cool

Boiled milk straight from the burner to the refrigerator without worrying about a thing.

The moment you place that hot milk inside our refrigerator, our 'category first' intuitive technology activates booster air vents that send strong frigid air towards it to cool it down without affecting the surrounding food or spoiling the milk.

Hot to Cool plate

Place the boiling milk vessel from the burner...

...straight on the Hot to Cool plate

EasyFresh Technology

The unique moisture management system is an integral part of EasyFresh technology which is powered by DuoCooling.

Opening the refrigerator door multiple times affects the moisture content inside the refrigerator, which in turn affects the freshness of fruits and vegetables. Our intuitive technology locks the moisture inside our fruits and vegetables compartment, ensuring freshness for a longer time.

Keeps food fresh for longer

Maintains optimum temperature and humidity

Customisable high/low humidity

Innovations that demonstrate our love for food

iCoolTouch

The refrigerator's control panel provides convenient access to multiple functions. With a touch interface, you can easily and precisely switch modes with a simple tap.

Spice boxes

Crafted especially for India, the spice boxes come with an easy grip and airtight silicone locking seal. These boxes maintain freshness, minimise loss of aroma & flavour, and prevent them from mixing with other food items.

DryStorage

DryStorage is a spacious base stand drawer for semi-perishable items like potatoes and onions. It frees up kitchen space by eliminating the need for extra baskets.

FreshBox

Can be used to store non-vegetarian items like meat and fish in a covered and vacuum-sealed environment that maintains freshness and avoids odours and spillage.

VarioSafe

Provides clarity and creates order. Smaller foods and packages, tubes and jars can be perfectly stored in the drawer.

Vegetable sorting system

The uniquely designed sorting system offers flexible spaces for storing leafy and solid produce separately, without any worry of them mixing up.

IceCream box

Keeps your ice cream fresh in an airtight environment, which avoids frost formation in ice cream and increases its shelf life.

FlexiDrawer

A flexible storage option that can fit into any shelf and can keep delicate packaged products separate and safe.
