

Convenience At Your Fingertips

Quality, Design and Innovation

SUJK 1510

LIEBHERR

Door-on-door technology: Allows custom panels to be affixed directly onto the appliance door so that the hinges are concealed, plus the cabinet and the fridge open as one, ensuring a wide range of design options and easy installation.

SoftSystem: In built-in appliances, SoftSystem technology allows doors to close automatically and gently from 30° to eliminate slamming even when fully loaded.

The **SUIK 1510** undercounter fridge is suitable for Side-by-Side installation in conjunction with Liebherr's **SUIG 1514** undercounter freezer for integrated use.

Liebherr's **SUIK 1510** undercounter fridge is suitable for built-in Side-by-Side installation together with the SUIG 1514 undercounter freezer. Airflow in our undercounter appliances enters and exits at the front of the appliance – this happens at plinth level. One advantage is that no ventilation grill is required in the worktop.

Additionally we have SoftSystem technology as an innovative solution for added safety and convenience. Integrated in the door, SoftSystem ensures that it closes automatically and gently from an opening angle of approximately 30°.

Opt for our high-quality and easy-to-fit stainless steel panel and handle to seamlessly integrate this model into your kitchen!
