LIEBHERR

For wine collectors, temperature, humidity, vibration, and light are the most important elements of wine storage. As a dual-temperature zone wine cabinet, the **UWTes 1672** clearly addresses all four areas and is perfect for all reds, whites, and champagne.

This appliance ventilates through the toe kick, hence no counterslot is necessary, and can be integrated easily and elegantly into your customised kitchen. It also boasts a digital temperature display with visibility through elegant glass doors.

Electronic LED Display: Intuitive navigation of the button control system enables tailored storage options. The digital temperature display can be viewed via the UV tinted glass door.

Tinted glazed door: The tinted glass door provides not only a perfect UV protection, but also an optimum glance at wine.
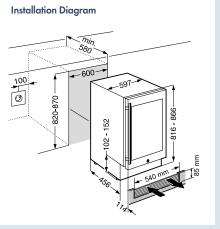

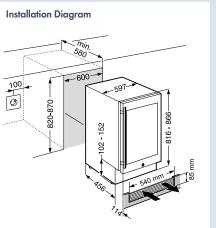

LED lighting: The light in the cooling compartments can be dimmed to give a pleasing ambient light inside the appliance.
