OKes 1750

## LIEBHERR

Refrigeration and freezing

## The robust fridge for outdoors.

Some days you just have to go outside. To party, appreciate nature, relax, or cook with friends. Regardless what the weather is like.

Our Outdoor Cooler means you have a very reliable partner at your side. The robust appliance was created especially for use outdoors and takes care of your food and drink just as you would like it. Everything stays fresh and ready to be eaten and can be immediately cooked on a barbecue or in a pan. Put your faith in decades of Liebherr cooling expertise.

<sup>1</sup> As per EU Regulation 2019/2018. <sup>2</sup> Measured as per EN 16902:2016.

<sup>3</sup> In accordance with Regulation EU 2019/2016 we indicate the total volume to the nearest integer (rounded off) and the volume of the frozen compartments and refrigeration compartments to one place after the decimal point.

## Outdoor

Outdoor kitchens with refrigerators are in fashion: whether they are freestanding or built-in, you needn't miss out on convenience, ergonomics and perfect storage outdoors, too. Thanks to its rust- and weatherproof materials, robust construction and high-quality components the Outdoor Cooler is ideally suited to outdoor use. The automatic shut-down at low temperatures and the integrated lock also contribute to this.

### Protective stainless steel shield

In order to cope optimally with the particular conditions of exterior use, the door is made of high-quality stainless steel. The material and perfect finishing means you can rely on the familiar Liebherr quality outdoors, too.

### Equipped with water and weather resistant protection!

Don't let the weather ruin your barbecue. Our weather resistant outdoor cooler can be left outdoors and protected from a summer thunderstorm or winter snow. Additionally, the IPX-4 splash-proof rating of the compressor and electronics ensures splashes from nearby pools and harsh weather conditions are not a problem.

### Everything under control

Cooking on a barbecue can be a bit rough and ready. Thanks to its robust construction, the handle can easily withstand being opened with force. Dirt and grease spots can be quickly removed from the easy to clean and rust-free stainless steel. With a little water and detergent, the handle is soon restored to a spotless condition.

### No chance for thieves

Whether you are just cooling beverages for a party or want to soak a juicy piece of meat in marinade, both of these should still be there when the party starts. The integrated lock reliably protects your delicacies from greedy pilferers. No more locking the fridge door after the food has been bolted down.

### Optimised for food and drink

Both beverages and foodstuffs such as vegetables, sauces or meat can be optimally stored in the flexibly adjustable interior. The interior can be set up according to the height of the foodstuffs, bottles or containers. The cooling temperature can also be adjusted between +2°C and +14°C.

### Extended barbecue season

Our Outdoor Coolers have no problems whatsoever with low temperatures. On the contrary – the appliance also runs optimally at outdoor temperatures of +2°C to +35°C. And if the temperature drops below +2°C, the appliance automatically shuts down to protect itself.

### Flexible and ergonomic interior layout

The lower area offers space for beer, water or wine bottles, while smaller packages or bottles can be securely stored in the two door racks. The glass shelf on telescopic rails offers a view of the goods stored at the back of the glass shelf and a good overview of your foodstuffs. Depending on size, beverage cans, bottles and salads can also be stored on the two height-adjustable glass shelves. They can be moved with one hand in a matter of seconds. In addition, one glass shelf can be split in order to store and cool larger containers such as ketchup, opened barbecue sauces or decanters upright.
