Freestanding appliances in Liebherr's
new DarkGrey colour tone

LIEBHERR

Refrigeration and freezing

An added touch of elegance for your kitchen: the new colour tone DarkGrey (RAL 7024) combines modern design with stylish subtlety. The calm aesthetic adds a warm accent and matches harmoniously with materials such as wood, stone and concrete. The appliance becomes an elegant eye-catcher in any tastefully designed kitchen.

¹You can find the full range of efficiency ratings at home.liebherr.com/energylabel

Due to space limitations, only the key features are mentioned. Detailed model descriptions for the model you're interested in can be found at home.liebherr.com

Recessed grip: elegant simplicity

Thanks to the elegant recessed grip, the handle does not extend into the room. Your Liebherr appliance integrates perfectly into a puristic, handle-free aesthetic. It's also easy to open the door.

Handle with opening mechanism: comfort in the palm of your hand

The ergonomic lever handle adapts gently to your hand movement, making the door particularly easy and convenient to open. It's even easier to open your Liebherr appliance.

BioFresh: the freshness all-rounder

Food in BioFresh safes stays fresher for up to five times longer at close to 0 °C and an ideal humidity. Store fruit and vegetables in the air-tight Fruit & Vegetable safe – and meat, fish, and dairy products in the Meat & Dairy safe.

EasyFresh: ideal for fruit and vegetables

Unpackaged fruit and vegetables feel right at home here: the food is stored in the air-tight safe at the same temperature as in the fridge compartment, keeping it fresh for a particularly long time.

DuoCooling: no more drying out

Due to the two separate cooling circuits, there is no air exchange between the fridge and freezer compartments. This means that the food does not dry out, and no odour forms.

NoFrost: no more defrosting

Nobody wants to see frost and ice in their freezer compartment, because an iced-up appliance uses more energy. NoFrost protects the entire freezer compartment from icing up. You'll never have to put in the effort to manually defrost again, and it also saves you real money.

Smart Frost

Much less frequent defrosting.

Touch Control

The one touch control of your appliance.

Door Stop

Keep your Liebherr appliance fresh and odour-free. The door stays open when the appliance is not in use. Save time and energy for added freshness.

Frost Protect

A particular suitability to low-temperature environments allows the installation of freezers even in unheated rooms down to an ambient temperature of -15 °C.

All the refrigeration technology is integrated in the appliance plinth of the freestanding BluPerformance appliances. As a result, appliances of the same size have a considerably greater storage capacity, meaning more space for food and drinks. Energy efficiency is significantly better thanks to improved ventilation and extraction in the plinth. Plus, these appliances are also quieter.

Touch display: easy operation at your fingertips

The touch display enables easy and intuitive operation of your Liebherr appliance: all functions are clearly arranged. A gentle tap on the required functions is all it takes to select them.

SmartDevice-ready: ready for the digital world

Want to make your kitchen smarter? Then retrofit your Liebherr appliance with the SmartDeviceBox. The SmartDeviceBox can be easily installed and opens up a whole world of digital possibilities.

Extremely quiet: a treat for your ears

Shhhhh – listen carefully: Your Liebherr is so quiet you have to strain your ears to hear it. The secret of the quiet-as-a-mouse appliance: all cooling components are perfectly coordinated.

Robust worktop: practical additional space

You can never have too much space in the kitchen. That's why our under counter appliances have a robust, scratch-resistant surface that can be used as an additional worktop. The panel of the fridges can be removed, allowing the appliances to slide under a worktop.

Simple design. Simply unmissable.
