Innovations 2027

Discover the highlights from our range of extra-large and efficient fridges, freezers and freestanding appliances.

LIEBHERR

Innovations 2027

Some things deserve to be preserved – the freshness of food, valuable resources and trust in quality. As a family business, we at Liebherr think beyond tomorrow. True innovation happens where technology serves people and preserves what truly matters.

Our new XL and XXL built-in appliances combine generous storage space, timeless design and long-lasting freshness. Intelligent features such as the SmartDevice App and the Appliance Analytics Dashboard provide transparency and convenience in everyday life.

For us, responsibility doesn't mean compromise – it means progress. Through products with high energy efficiency, durable components, and features that enable usage tailored to actual needs. This is how we combine German engineering excellence with a clear conviction: thinking today about tomorrow, to preserve what matters most to us.

Enjoy discovering our latest innovations.

All News at a Glance

More space for what matters most

Our new built-in refrigerators and freezers for the 194 cm niche offer impressive capacity while integrating seamlessly into modern kitchen designs.

Page 04

Preserving what your customers value

With targeted improvements in design, features and user convenience, the Vinidor and GrandCru collections, including their Selection ranges, will deliver an even more exceptional wine experience in the future.

Page 14

Designed for efficient freezing

Whether through a new appliance height or outstanding energy efficiency up to class A, our new freezers offer tailored solutions for a wide range of requirements. With TruAdapt, selected freezers also introduce a new approach to reducing energy consumption and further improving energy efficiency.

Page 16

Great craftmanship in every detail

More room for freshness, more freedom every day: Our new Msde 9010 and Msde 9510 French Door models combine generous storage capacity with intelligent features, elevating convenience, flexibility, and quality to a new level.

Page 18

When life gets bigger, your refrigerator should too

Our new XXL fully integrated fridge-freezer is the world's first to feature an IceMaker and two extra-large BioFresh safes, bringing outstanding design, an extra-class energy rating, and renowned German quality to the large-capacity segment.

Designed for homes that say yes to lively weekday family life and long, laughter-filled dinners with friends.

Yes to generous market hauls that keep your customers satisfied – thanks to extra-wide BioFresh safes keeping food fresh for up to 5x longer.

Yes to friends who always bring a plus one – with the automatic IceMaker keeping drinks perfectly chilled and the evening flowing.

The best moments can't be planned.
Only extended.

Extend what matters.

ICBNbi 7663 ⬡ Prime-Series
Available from Q3 2026

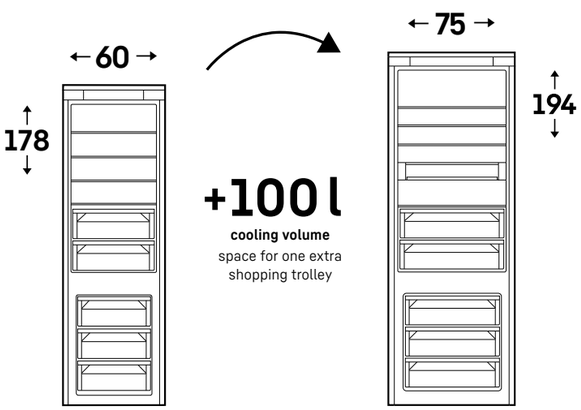

IceMaker with fixed water connection
The IceMaker produces up to 1.5 kg of ice per day. The extra-large drawer stores additional capacity when needed, while a divider allows flexible organisation based on demand.

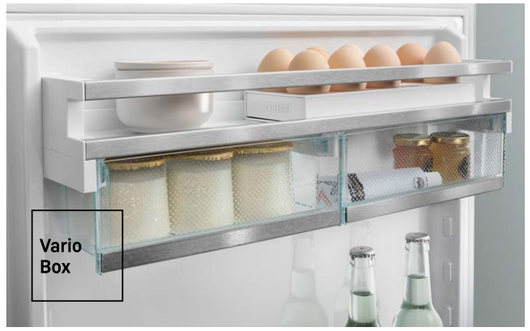

SoftSystem
With the SoftSystem, the fridge door closes softly and safely, and in a way which is pleasantly quiet and light.
Bottles stored in the inside door remain securely in place.

Extra-wide door shelves
The extra-wide door with extra-large door shelves provides ample storage for eggs, bottles and smaller items.

VarioBox
There's plenty of room for all those small but essential items – thanks to the extra-wide VarioBoxes. They help to keep small items neatly organised.

NoFrost
The extra-large NoFrost drawer offers generous space for frozen goods, with no room for frost. NoFrost reliably prevents unwanted icing in the freezer compartment.

BioFresh Fruit & Vegetable-Safe
With temperatures close to 0 °C and a tight seal that maintains high humidity, the extra-wide Fruit & Vegetable-Safe creates the ideal environment – keeping unpackaged fruit and vegetables fresh for up to 5x longer.

BioFresh Meat & Dairy-Safe
The extra-spacious BioFresh Meat & Dairy-Safe maintains temperatures close to 0 °C, creating ideal conditions for even the most delicate foods. Best of all, it comes perfectly preset for immediate use.

LightTower
The LightTower creates elegant lighting accents and showcases food with refined clarity. Even when fully loaded, the interior remains evenly and generously illuminated.

Flexible bottle shelf
The flexible bottle shelf creates space while preserving storage area: Sliding the glass shelf creates room for bottles while the remaining surface stays usable. If required, the glass shelf can be fully removed – creating additional space.

Steel-look rear wall
The elegant Steel-look rear wall delivers a refined look and feel. Its surface is food-safe and hygienic, supporting optimal storage conditions.

SIFNdi 5629 ♢ Plus-Series
Available from Q1 2027

IRBci 5620 ♢ Plus-Series
Available from Q3 2026

When design leads, calm follows.

With the world's first built-in side-by-side solution for the 194 cm niche with two single-door appliances, Liebherr responds to the growing demand for increased storage volume. The world's first 194 cm niche freezer, the SIFNdi 5629, featuring NoFrost technology and nine freezer drawers, together with the IRBci 5620 refrigerator equipped with three BioFresh safes, creates an unprecedented dimension of freshness and storage – continuous, clean and seamlessly integrated. More room for freshness. More freedom in planning. A new side-by-side combination that sets new standards – while blending effortlessly into its surroundings.

Two VarioSafes in value class Prime

For neatly organised storage of small items such as yoghurt pots, jam jars or tubes, the appliance IRBbi 5650 with two VarioSafes offer both order and flexibility. The VarioSafes are not only height-adjustable in two stages, but can also be placed wherever it suits you best within the refrigerator.

Bio Fresh

Perfect food storage depends not only on the ideal temperature, but also on optimal humidity. At Liebherr, we have developed innovative freshness technologies that keep food fresh for up to 5x longer. Our new XL fully integrated refrigerators feature three BioFresh safes for optimum storage conditions.

XL Fixed door freezing

SIFNdi 5629
Plus

Energy efficiency class:	D
Energy consumption per year / 24 h:	198 / 0,487 kWh
Total volume[1]:	239 l
Climate class:	SN-T
Aperture dimensions in cm (h/ w/ d):	194 – 195 / 56 – 57 / 55

XL Fixed door cooling

IRBci 5620
Plus

Energy efficiency class:	C
Energy consumption per year / 24 h:	102 / 0,279 kWh
Total volume[1]:	323 l
Climate class:	SN-T
Aperture dimensions in cm (h/ w/ d):	194 – 195 / 56 – 57 / 55

IRBbi 5650
Prime

Energy efficiency class:	B
Energy consumption per year / 24 h:	81 / 0,221 kWh
Total volume[1]:	325 l
Climate class:	SN-T
Aperture dimensions in cm (h/ w/ d):	194 – 195 / 56 – 57 / 55

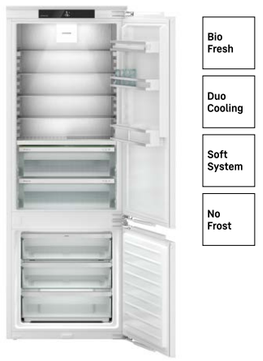

XXL Fixed door cooling and freezing

ICNc 7603
Pure

Energy efficiency class:	C
Energy consumption per year / 24 h:	160 / 0,438 kWh
Total volume[1]:	359 l
Climate class:	SN-T
Aperture dimensions in cm (h/ w/ d):	194 – 195 / 71 – 72 / 56

Also available as a fixed-door appliance in energy efficiency class D (ICNd 7603) or as a sliding-door model, also in energy efficiency class D (ICNSd 7603).

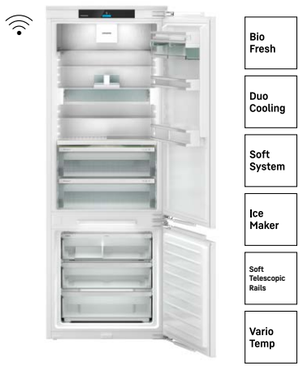

ICBNc 7623
Plus

Energy efficiency class:	C
Energy consumption per year / 24 h:	178 / 0,487 kWh
Total volume[1]:	347 l
Climate class:	SN-T
Aperture dimensions in cm (h/ w/ d):	194 – 195 / 71 – 72 / 56

Also available as a sliding-door model in energy efficiency class D: ICBNSd 7623.

XXL Fixed door cooling and freezing and fixed water connection

ICBNbi 7663
Prime

Energy efficiency class:	B
Energy consumption per year / 24 h:	142 / 0,389 kWh
Total volume[1]:	349 l
Klimaklasse:	SN-T
Aperture dimensions in cm (h/ w/ d):	194 – 195 / 71 – 72 / 56

[1] Total volume: In accordance with Regulation EU 2019/2016 we indicate the total volume to the nearest integer (rounded off) and the volume of the frozen compartments and refrigeration compartments to one place after the decimal point. According to (EU) 2017/1369 6a.

[2] Appliances marked with the WiFi symbol are Smart Home ready out of the box. All other appliances can be connected at a later stage using the SmartDeviceBox, available separately.

When the future matters, there is no room for compromise.

With the new ICBNai 5153 built-in fridge-freezer combination, Liebherr introduces a fully integrated solution featuring two large BioFresh drawers as well as Energy Efficiency Class A and Noise Emission Class A. Outstanding cooling performance, precision engineering, and seamless integration into modern kitchen concepts come together to create a compelling overall package. Designed for those who value energy efficiency and long-term quality.

BioFresh on Telescopic Rails
This Liebherr appliance stands out with the highest energy efficiency rating: Class A. The BioFresh drawers keep food fresh for up to five times longer and can be fully extended and gently closed thanks to smooth-running telescopic rails.

NoFrost and VarioTemp
NoFrost keeps the freezer permanently ice-free, eliminating the need for manual defrosting. Meanwhile, VarioTemp delivers ultimate flexibility, allowing the freezer compartment to be converted into additional refrigeration space whenever needed.

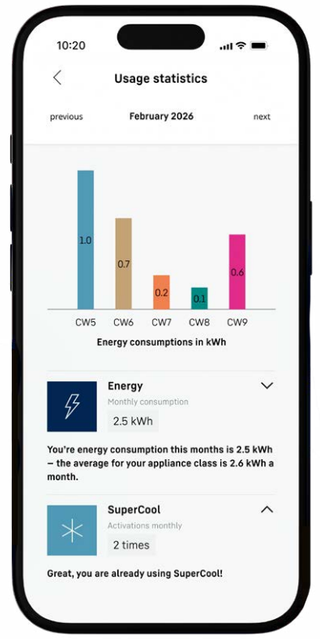

UltraSilent – Perfect for Open-Plan Living Spaces
Experience virtually silent cooling with Liebherr's UltraSilent built-in appliances. Operating at a whisper-quiet 29 dB(A), they are the ideal choice for open-plan living spaces where comfort, tranquility, and a pleasant atmosphere take center stage.

Energy Monitoring – Efficiency at a Glance

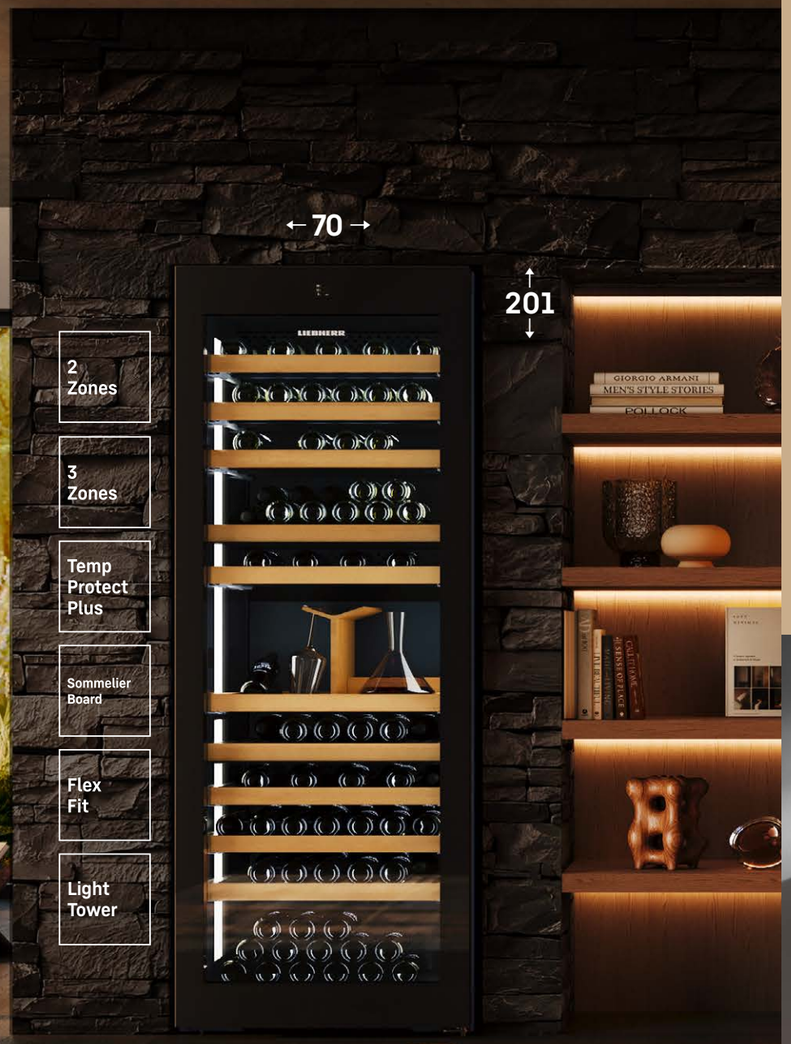

A refrigerator operates 24/7 to keep food fresh and tem-pe-ratures stable. With the Energy Monitoring feature in our SmartDevice app, customers gain valuable insights into how everyday habits – from frequent door openings to using functions such as SuperCool – affect energy consumption.

The result is greater transparency and genuine control. Customers can clearly understand their energy usage, identify optimisation opportunities, and experience efficiency as something tangible and measurable. Energy monitoring provides a clear visualization of energy consumption data, helping users gain deeper insights into their usage patterns.

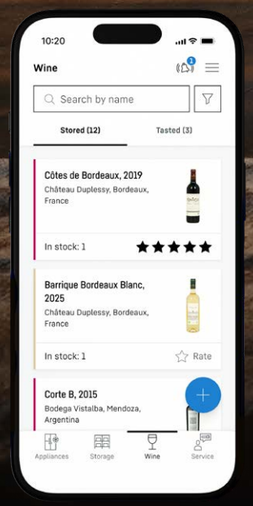

Treasuring true taste.

Wine is all about getting the little things right – an approach Liebherr extends to its wine fridges. In 2026, this comes to life through a range of thoughtfully crafted enhancements that elevate both the functionality and design of the Vinidor and GrandCru collections, including their Selection ranges.

WPgbi 7483 Vinidor Selection
Available from Q1 2027

Digital wine management – Your customers' collection at a glance

With the new Wine section in the SmartDevice app, your customers can manage their wine collection more easily than ever before. They can keep track of their wines at any time: Which bottles do they still have? Which ones have they already enjoyed? They can also rate each bottle to help remember their favourites. Simple, smart and always accessible.

DarkGrey interior
With a DarkGrey inner liner and rear wall, a consistent interior colour scheme runs across all wine fridges, creating a sophisticated backdrop for your customers' wine collection. This contributes to a cleaner, more uniform appearance, further enhanced by repositioning the user interface behind the door on selected models.

FlexFit wooden shelf
For Vinidor Selection, the interior has been further optimised for better ease of use – a single FlexFit wooden shelf is now positioned below the zone separator to make the best use of space for storing larger bottles.

WPbl 4652 Vinidor-Series
Available from Q1 2027

Door handle solutions
GrandCru and GrandCru Selection wine fridges now offer two distinct handle options: a fixed handle and a recessed grip.

Our new two-zone model
With the addition of a new wine fridge in black featuring 2 temperature zones, the Vinidor collection has been expanded to meet a broader range of customer needs.

Intelligent freezers that rethink efficiency – and set new standards.

Our expanded freezer portfolio offers greater flexibility for a wide range of kitchen concepts – from compact niches to sophisticated built-in solutions.

With the new FNdi 4015 and FNa 465i models, we are creating new opportunities to seamlessly integrate freezing into everyday life without compromising on performance or convenience.

At the same time, intelligent technologies such as TruAdapt deliver efficiency that dynamically adapts to individual usage patterns.

TruAdapt – Built for all kitchens. Optimised for yours.

Before a Liebherr freezer leaves our factory, it is engineered, tested and optimised for performance and longevity. It is calibrated, set and rated. Then it arrives in its new home. In big kitchens. In small pantries. In hot environments. And cold ones. In single households and large families.

Each situation is different. Each places different demands on an appliance and on the energy it uses. These are appliances that run for years, every hour of every day. A different ambient temperature, a different pattern of use, a different rhythm. No fixed setting can be the most efficient one for all of them. Small things, repeated across that time, stop being small.

TruAdapt was created on this understanding. It's an intelligent control system that reads real conditions continuously – ambient temperature, usage patterns – and adjusts itself automatically. It adapts operation to changing environmental and usage conditions, supporting energy-efficient performance.

Intelligence, that continuously adapts

- **Adapts to your rhythm.** Real usage patterns, real ambient conditions. TruAdapt adapts to your kitchen, not a standardised test environment.
- **No action required on your part.** Every optimisation happens automatically in the background. You never need to adjust a setting or check an app.
- **Reliable performance as conditions change.** Whether the seasons change or your household does, TruAdapt automatically adapts operating parameters to changing usage patterns and environmental conditions.
- **Efficiency that stays**
  TruAdapt reads how your household actually runs and adjusts itself – this can contribute to optimising energy consumption under changing usage conditions.

More freezing comfort per square meter

The new FNdi 4015

This freezer fits neatly into smaller kitchens, cellars or utility rooms thanks to its compact 60 × 60 cm footprint and 105 cm height. At the same time, it offers thoughtful convenience: VarioSpace provides flexible storage, NoFrost prevents ice build-up, and the SmartDeviceBox enables smart home connectivity. The ideal solution for those who refuse to compromise, even when space is limited.

FNdi 4015 ○ Pure-Series
Available from Q1 2027

FNa 465i ⬡ Prime-Series
Available from Q1 2027

Maximum energy efficiency. Minimal space requirements.

The FNa 465i expands Liebherr's portfolio of free-standing freezers with a model featuring Energy Efficiency Class A and an annual energy consumption of just 91 kWh. With a width of 60 cm, it is the first appliance to bring the highest energy efficiency class currently available to this space-saving, compact design.

Combining NoFrost convenience, generous capacity and a thoughtfully designed interior for intuitive organisation, this Prime appliance is engineered for modern living. Its uncompromising focus on efficiency and ease of use sets a new benchmark in the category.

More choice in the French Door segment

Our French Door appliances are truly impressive: maximum storage space for freshness, combined with outstanding quality down to the finest detail. The new Msde 9010 and Msde 9510 French Door models expand our existing portfolio and feature an integrated ribbed interior structure as well as two full-width glass shelves – delivering greater convenience and flexibility in everyday life.

Msde 9510 ○ Pure-Series
Available from Q1 2027

Msde 9010 ○ Pure-Series
Available from Q1 2027

FlexDoorSystem

The patented FlexDoorSystem makes opening and closing your Liebherr appliance remarkably easy and secure – even when each door is operated separately. A unique sealing system ensures smooth, quiet handling and an airtight closure, supporting greater energy efficiency.

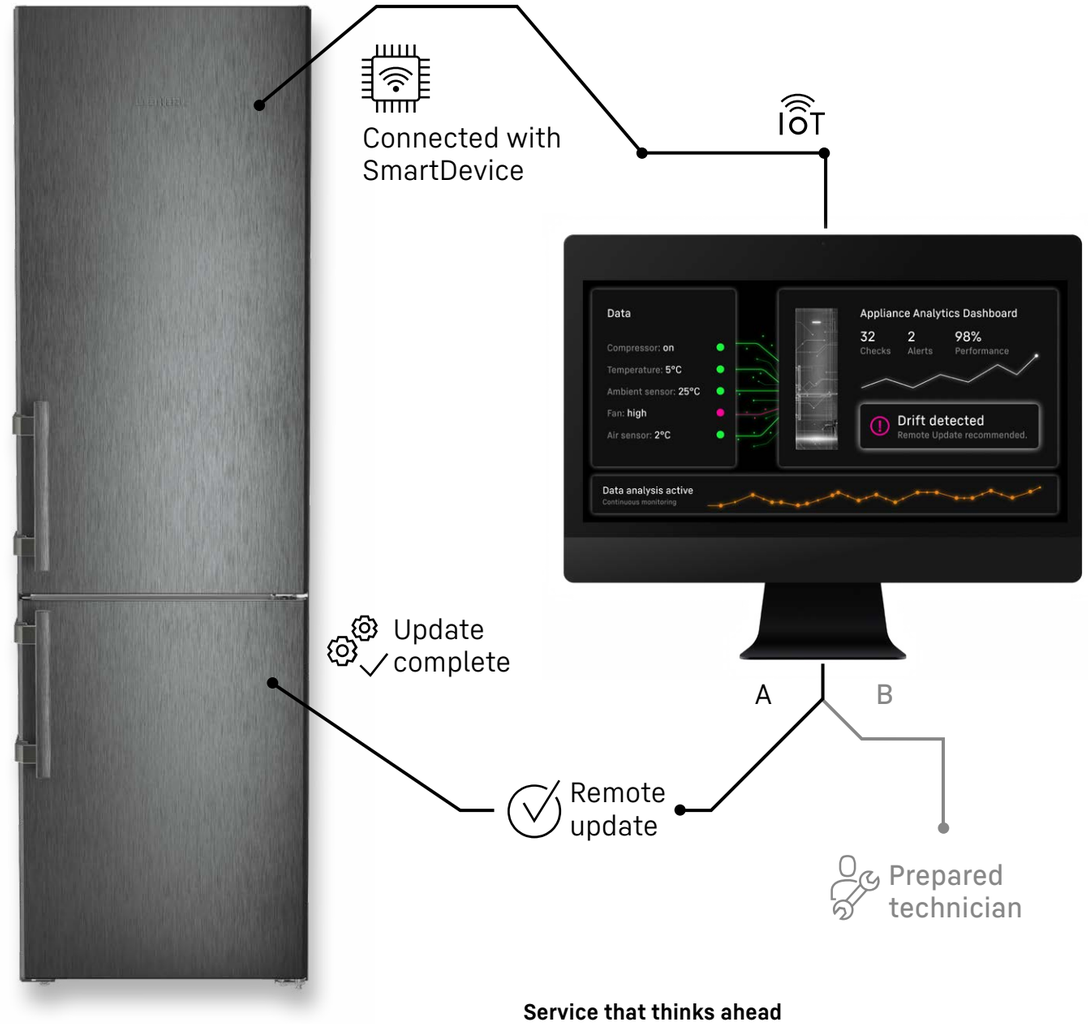

Tilting Door Shelf

More space where it matters: This clever tilting compartment makes optimal use of the area beneath the door shelves, creating additional storage for smaller items such as tubes, jars, and small bottles while keeping everything within easy reach.

Appliance Analytics Dashboard – Service intelligence, built in.

What if support was already there before it was even asked for? And what if a service technician arrived already knowing the appliance's story – informed and prepared? Our connected appliances continuously share operational insights. Remote diagnostics and intelligent analytics help maintain long-term performance. This is how service becomes truly proactive – and data becomes service intelligence.

Service that thinks ahead

At Liebherr, innovation doesn't end with the product. It begins where technology makes a tangible difference to everyday life – and continues seamlessly into service. With the Appliance Analytics Dashboard, we're taking the next step: building on our strong service foundation with connected, intelligent insights that support the entire product lifecycle.
