LIEBHERR

Optimal freshness

When it comes to groceries, you care about top quality and an authentic culinary experience. You find joy in taking small detours to explore local stalls brimming with fresh, regional fruits and vegetables, or perhaps indulging in your favourite imported delicacies like exotic fruits, artisanal cheeses, or olives. Wouldn't it be great if you could still taste this quality, even after several days in the fridge? Almost as if time were standing still? We think it would.

That is what motivates us to constantly develop new and even better solutions that guarantee perfect storage conditions for all kinds of groceries. For long-lasting freshness, to protect valuable vitamins, and for food that tastes as if it had just been bought or harvested.

Refrigerators and freezers

A tradition of reliability admired the world over.

For 75 years, Liebherr has offered high-quality products for pioneering industries. With our customers and partners all over the world, we constantly reach new heights.

One big family

The Liebherr Group was established in 1949 by Hans Liebherr. With a history spanning 75 years, the family-run company is characterised by stability and reliability. Liebherr is one of the biggest manufacturers of construction equipment and is also successful in many other industries. The Group has a decentralised organisation with more than 50,000 employees worldwide and is divided into independently operating business units.

The Group now encompasses 13 product segments – earthmoving machinery, material handling technology, deep foundation machines, mining, mobile and crawler cranes, tower cranes, concrete technology, maritime cranes, aerospace and transportation systems, gear

technology and automation systems, refrigerators and freezers, components and hotels – and comprises more than 140 companies across all continents. The holding company of the Group is Liebherr-International AG in Bulle (Switzerland), all of whose shareholders are members of the Liebherr family.

Cutting-edge combined with experience: Appliances

The Appliances division was established at the Ochsenhausen site in 1954, and for many years it has played an important part in the development of the Group.

For 70 years, Liebherr has been a premium manufacturer of innovative refrigerators and freezers for domestic and commercial use. With an annual production of more than 2.2 million appliances, Liebherr is one of Europe's leading suppliers of cooling and freezing appliances. The five production sites in Ochsenhausen (Germany), Lienz (Austria), Radinovo (Bulgaria), Kluang (Malaysia) and Aurangabad (India) form a manufacturing network for refrigerators and freezers that meet all the most up-to-date standards.

Liebherr is active all over the world. With a dense network of sales subsidiaries and offices in Bulgaria, Germany, the UK, Austria, Canada, Malaysia, Russia, Switzerland, Singapore, South Africa, the USA, and India. The refrigeration and freezing specialists ensure that customers receive expert advice and service and maintenance work is provided professionally on-site.

Quality

Even the smallest detail deserves the utmost attention.

We prioritise uncompromising quality – down to the tiniest screw. And we have done so from the very start. We have been manufacturing high-quality refrigerators and freezers and selling them worldwide since 1954. However, at heart, we are still a family business with deep roots in Germany. It is here that we continue to develop all our products just as before. German engineering – out of loyalty to our founder and with the knowledge built up by generations of engineers.

Convenience for everybody.

Our new fully integrated appliances are available in different series: Pure, Plus, Prime and Peak. But whatever series you opt for, every single Liebherr comes with uncompromising Liebherr quality. This is because even in the Pure series, every appliance comes with a wide range of features. One example is NoFrost – the automatic defrosting function. Another is our EasyFresh technology for storing fruit and vegetables. Then there is our DuoCooling feature. With two separate refrigerant circuits, it ensures that no air is exchanged between the fridge and freezer compartments. The stored groceries do not dry out, and no odours are transferred.

Built to last.

You can experience our quality standards in the smallest of details. For example, before a door hinge is approved by us, it must pass through at least 100,000 opening cycles. This corresponds to a usage period of more than 15 years. We also test all other functional parts to ensure they can last just as long.

And if, contrary to expectations, a small detail no longer meets your requirements, you or our premium service partners can usually correct it quickly. Because all our appliances are extremely repair-friendly. We keep all essential spare parts in stock. This practice is not just sustainable; it also saves you money on minor repairs or purchasing a new appliance.

Power Cooling

Do you want to be sure that the cold is distributed as evenly as possible in your refrigerator? If so, the PowerCooling system is what you need. The fan – as powerful as it is quiet – distributes the cold air efficiently throughout the entire refrigeration compartment.

Freshness and convenience

Tasty for longer

You don't compromise when you're shopping. You look for natural ingredients, the best quality, and maximum freshness. Of course, anyone who values good food wants to keep it fresh for as long as possible. That is precisely why we have developed innovative freshness technologies and improved them year after year, so your food still tastes fresh after some time in the refrigerator.

Bio Fresh

The reliable BioFresh technology keeps food at a temperature just above 0°C, much cooler than in the rest of the appliances. With the perfect humidity in the Fruits and Vegetable Safe, they stay fresh even longer in the airtight compartment. Meat, fish and dairy products enjoy ideal conditions in the Meat & Dairy Safe.

Duo Cooling

Our basic technology is in all fridge-freezers. Two completely separate cooling circuits ensure that there is no air exchange between the fridge and freezer compartments. The food neither dries out nor spreads odour.

Door-on-door

This technology allows custom panels to be affixed directly onto the appliance door so that the hinges are concealed, plus the cabinet and the fridge open as one, ensuring a wide range of design options and easy installation.

Ice Maker

Liebherr's automatic IceMaker produces flawless crescent ice and keeps a constant supply on hand for every occasion.

Flex System

Small and delicate fruit in the refrigerator can easily roll out of sight or become crushed. That's why your Liebherr comes with the FlexSystem. Two flexibly positionable boxes in the BioFresh safe ensure everything is arranged and organised. And they also safely protect even the smallest raspberry from bruising or from being mixed up with other foods.

Vario Space

Want to store a multi-layer ice cream cake safely until the summer party? No problem with your Liebherr freezer: Sometimes you just need more space, and it's prepared for just that. With VarioSpace, you can remove individual freezer drawers and the horizontal glass dividers below them, and hey presto, you have an extra-large storage space.

Design

Timeless and elegant. Design for every kitchen.

Hidden behind the panels of your integrated kitchen, your Liebherr is inconspicuous and lets the design of the kitchen take the spotlight. But once you open it, it's immediately apparent that behind the door lies something very special.

Design meets functionality.

Purist and timeless, on one hand. Elegant and exclusive on the other. The new design language blends seamlessly into any interior: The precise craftsmanship, an eye for detail and the harmonious combination of materials, shapes and colours create an aesthetically pleasing whole. This is subtly highlighted by the new lighting concept, LightTower.

Tower LED

The Tower LED lighting concept evenly illuminates the interior while supporting the glass shelves. Flexible, space-saving, unique.

Fully integrated key features

Integrated key features

Divisible glass shelf

One half of the split glass shelf can slide underneath the other to provide even greater flexibility for food storage and the accommodation of the taller containers. All glass shelves are made from safety glass and can be positioned at different height levels.

Side panel heating

Side-by-Side appliances come with an embedded side panel heating system, which utilises the refrigerant's heat and prevents moisture from condensing between the appliances. The process is energy efficient because no additional energy needs to be consumed.

Reversible door hinges

It gives flexibility to open the door from either the left or the right side, depending on the user's preference or space constraints. This feature enhances convenience and adaptability, making it suitable for different kitchen layouts.

Magic Eye

Our control panel ensures all functions are easy and convenient to use as well as guarantees that the settings selected remain accurate and constant.

Soft System

The SoftSystem closing damper is comfortable and highly practical in everyday use. When the door is closed, the SoftSystem integrated with the door dampens the movement and ensures particularly soft closing even when the door interior is fully loaded.

Soft Telescopic Rails

Drawers with the SoftTelescopic feature are fully extendable. They are designed with a convenient self-retracting and soft-closing mechanism. The drawers can be removed with the door open at an angle of only 90°.

Bio
Fresh

BioFresh: enjoy lasting freshness

With BioFresh technology, food keeps fresh for much longer. When stored at a temperature close to 0°C and at the correct humidity level, many foods retain their nutrients, such as vitamins and minerals, for far longer than in a conventional fridge compartment.

Considerably longer shelf life

Newly purchased and freshly harvested foods are to be stored properly so that their nutrients are preserved for longer. The dry conditions in the DrySafe is ideal for storing meat, fish and dairy products. The shelf life and freshness of most fruits and vegetables can be significantly extended by storing them in a fridge, particularly in the Fruit & Vegetable safe. The high humidity in this storage environment means less moisture is lost from food, keeping fruit and vegetables fresh and crisp. By adjusting to low humidity, the Fruit & Vegetable Safe can also be used as an additional DrySafe.

Less packaging is better for the environment

More and more packaging waste is being produced, which is harmful to our environment. This is one of the reasons why the Fruit & Vegetable Safe was developed. Here, fruits and vegetables are best stored unpackaged, and they also maintain their freshness for longer. This means there is nothing to stop you from shopping at the farmer's market or in the packaging-free supermarket. The practical FlexSystem (depending on the model) helps to separate and sort products neatly and cleanly.

*T & C apply. Result based on Liebherr's internal lab standard test conditions. Actual results may vary depending on usage under different conditions, refrigerator settings, and individual food item conditions.
