**Love Innovation.
Love Liebherr.**

 German Engineering

LIEBHERR

Global success: The Liebherr Group.

Liebherr is a third-generation, family-owned company founded in 1949 by Hans Liebherr with his groundbreaking invention of the world's first mobile tower crane.

With over 70 years of success, Liebherr is known as a pioneer in high-quality, breakthrough innovations and countless cutting-edge technologies in numerous industries. One of the world's largest manufacturers of construction machinery, Liebherr has expanded its broadly diversified portfolio to 13 product segments, including earthmoving, deep foundation machines, mobile and crawler cranes, tower cranes, concrete technology, material handling technology, mining, maritime cranes, aerospace and transportation systems, gear technology and automation systems, components, hotels, and refrigeration and freezing. The company currently employs about 49,000 people in more than 140 companies in over 50 countries worldwide.

Refrigeration and freezing

Liebherr Appliances India Private Limited specialises in the production of high-quality refrigerators and freezers for the Indian market. The new production plant covers an area of 2,02,343 sq. mtr. The ultra-modern and flexible production facilities have a capacity of around 5,00,000 units per year, and can be expanded when necessary.

Image of the Liebherr Appliances India

Preserving Freshness Since 1954

We, at Liebherr, understand your need for a refrigerator that you can trust to preserve the freshness of your food for a longer duration. We also appreciate the importance of providing you with an improved user experience through our products. That is why we apply our seven decades of expertise to bring you intuitively innovative technologies that keep your food fresh for longer and make handling your refrigerator absolutely effortless.

Images are for representation purpose only.

FreshBreeze

A first-in-category innovation that will redefine how you experience freshness.

Introducing Liebherr's FreshBreeze technology—an engineering marvel that visibly transforms your refrigerator into a freshness sanctuary. With FreshBreeze technology, a fine mist is released, preserving the natural structure, vibrant colour, and taste of your fruits and vegetables like never before.

To further elevate hygiene, Liebherr integrates BlueLight technology which continuously reduces bacterial growth, supporting your family's health. The advanced German Duo Cooling technology powers precise temperature and moisture control, ensuring long-lasting freshness that you can see, feel, and trust.

See the difference. Taste the difference. FreshBreeze isn't just a feature—it's a revolution in freshness, crafted exclusively for Indian homes.

Hot to Cool

Boiled milk straight from the burner to the refrigerator without worrying about a thing.

The moment you place that hot milk inside our refrigerator, our 'category first' intuitive technology activates booster air vents that send strong frigid air towards it to cool it down without affecting the surrounding food or spoiling the milk.

Lever Handle

Struggles with opening vacuum-sealed refrigerator doors will be passé, with 70% less pull force.

Our lever handle mechanism helps operate even the heaviest of doors with 70% less force compared to fixed handle doors.

*Comparison is made with similar existing models. Results may vary based on individual usage and operating conditions. Terms and conditions apply.

Convertible

Adaptable Storage for Every Occasion

Effortlessly adapt your refrigerator to suit every season and occasion. With the convertible feature, you can switch the freezer compartment into fridge mode, creating extra space whenever you need it. Perfect for festivals, family gatherings, or simply stocking up on fresh food.

Innovations that demonstrate our love for food

iCoolTouch Control

The refrigerator's control panel provides convenient access to multiple functions. With a touch interface, you can easily and precisely switch modes with a simple tap.

Spice boxes

Crafted especially for India, the spice boxes come with an easy grip and an airtight silicone locking seal. These boxes maintain freshness, minimise the loss of aroma & flavour, and prevent them from mixing with other food items.

IceCream box

Keeps your ice cream fresh in an airtight environment, which avoids frost formation in ice cream and increases its shelf life.

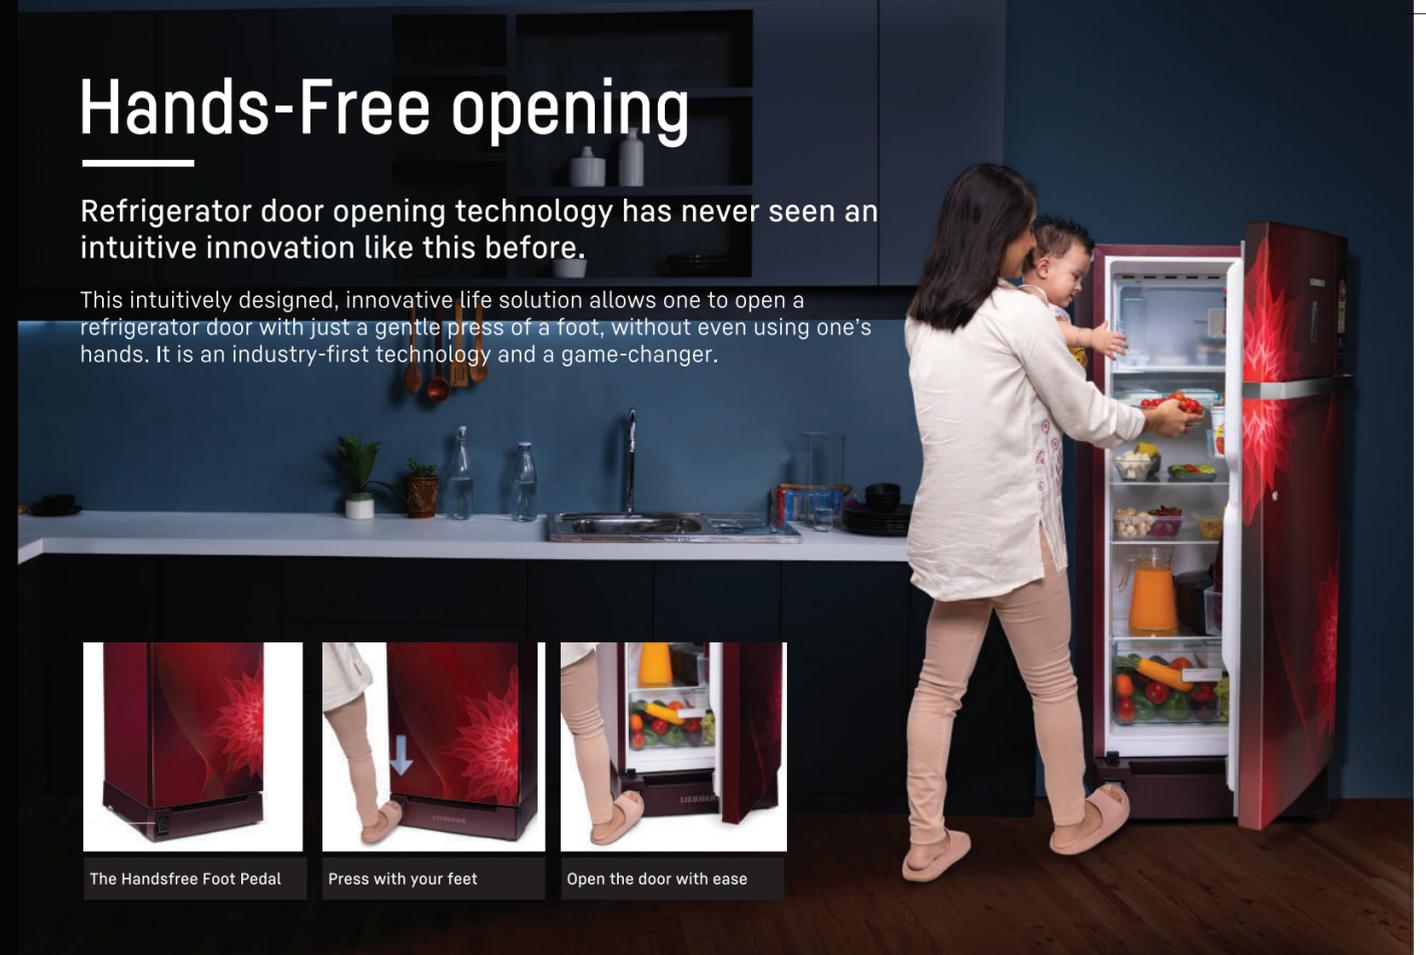

FreshBox

It can be used to store non-vegetarian items like meat and fish in a covered and airtight environment that maintains freshness and avoids odours and spillage.

Hands-Free opening

Refrigerator door opening technology has never seen an intuitive innovation like this before.

This intuitively designed, innovative life solution allows one to open a refrigerator door with just a gentle press of a foot, without even using one's hands. It is an industry-first technology and a game-changer.

The Handsfree Foot Pedal

Press with your feet

Open the door with ease

Vegetable FreshBox

Designed with a bigger pull-out vegetable basket at a 90° door opening, this feature offers maximum storage and effortless access to your fresh vegetables. It also comes with a vegetable sorting system

DryStorage

DryStorage is a spacious base stand drawer for semi-perishable items like potatoes and onions. It frees up kitchen space by eliminating the need for extra baskets.

Innovation, Elevated by Experience.

For over seven decades, Liebherr has set the benchmark in refrigeration through unmatched German technology and a single-minded focus on freshness. From thoughtful innovations to advanced cooling solutions, we are committed to reimagining refrigeration for Indian households—so your food stays as fresh as your trust in us.
