

Technical data
Hydraulic crawler crane

Complies with ANSI B 30.5

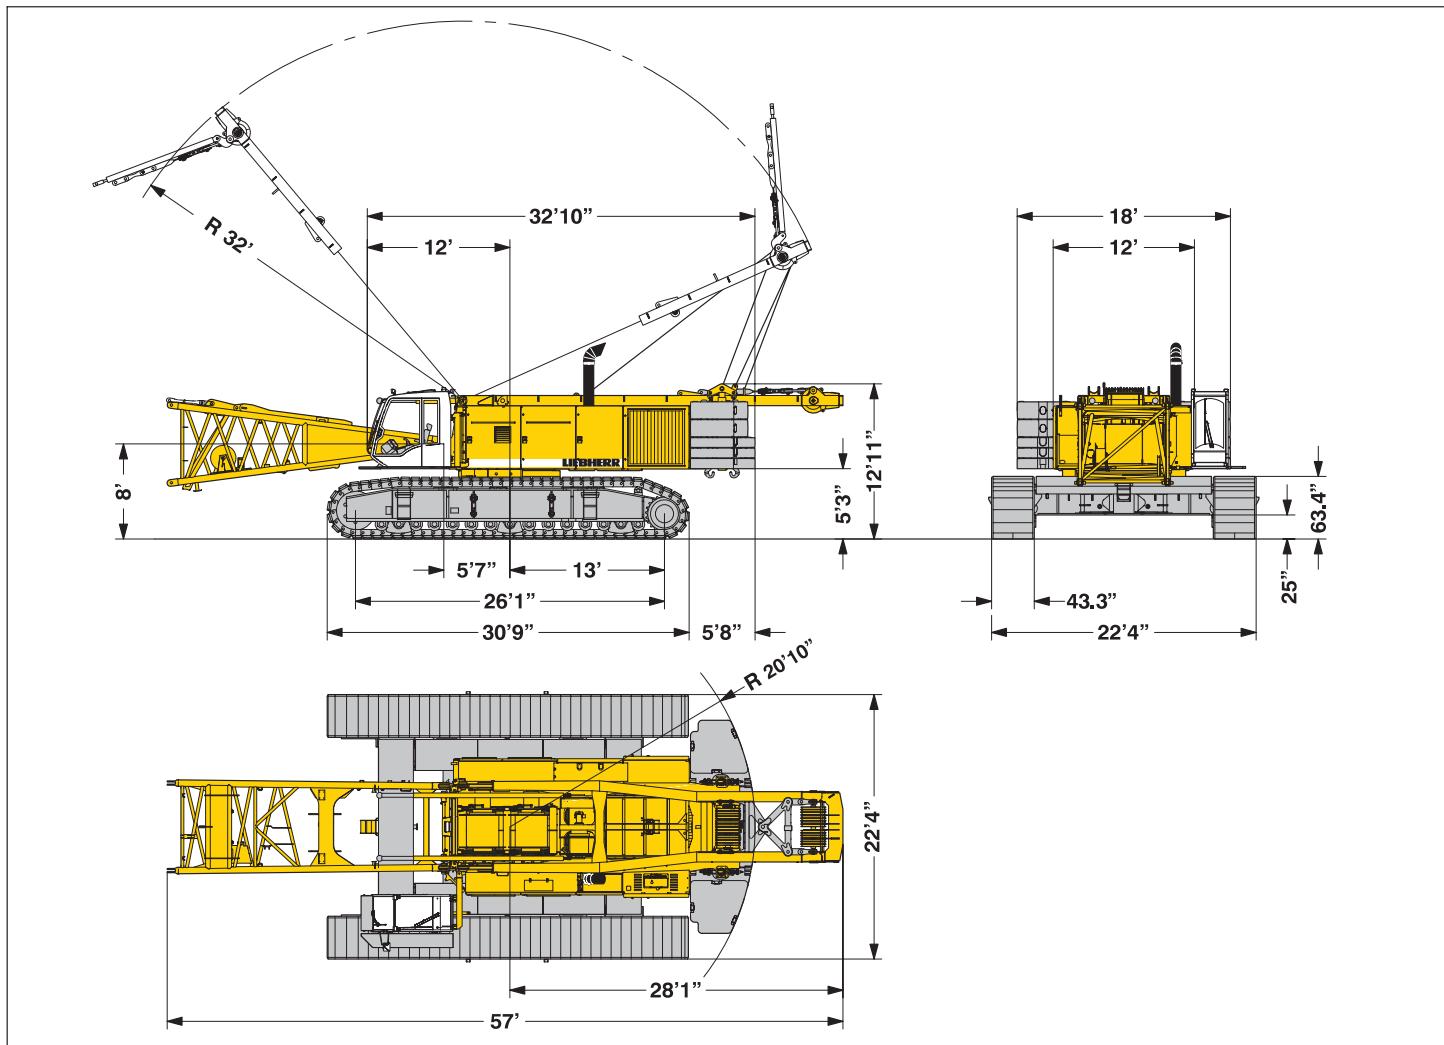

HS 895 HD
Litronic®

LIEBHERR

Dimensions

Basic machine with undercarriage

Operating weight

The operating weight includes the basic machine with HD undercarriage, 2 main winches 66,200 lbs including wire ropes (492 ft) and 66 ft boom, consisting of A-frame, boom foot (23 ft), boom head (23 ft), boom section (20 ft), 121,500 lbs basic counterweight, 43.3 inch flat track shoes and 110,200 lbs hook block.

Total weight _____ approx. 373,000 lbs

Ground pressure

Ground bearing pressure _____ 13,8 PSI

Equipment

Main boom (No. 2220.xx) max. length _____ 276 ft

Fixed jib (No. 0806.xx) _____ 36 ft - 105 ft

Modular designed equipment for operation as crane, with dragline or clamshell.

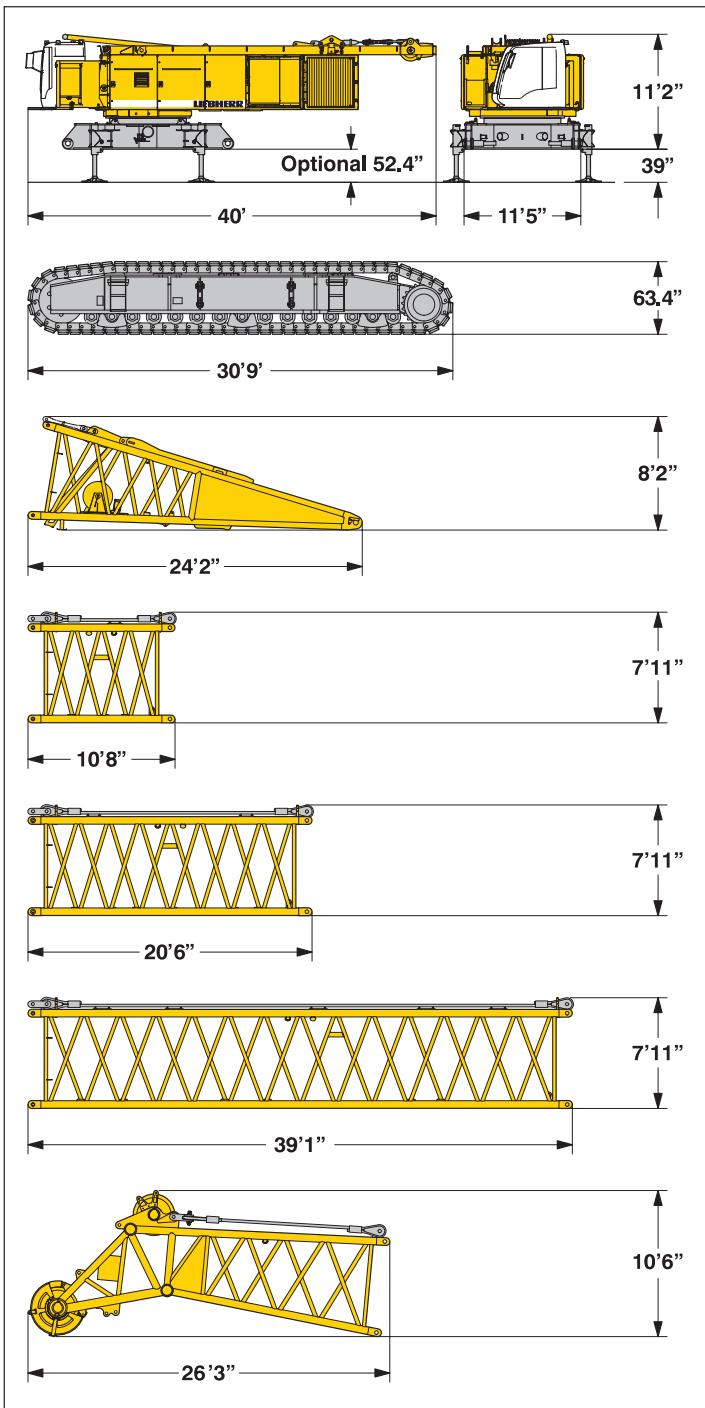

For dragline operation, a rotating fairlead is fitted into the boom foot. This minimizes the rope angle to drum, which results in lower rope wear.

Remarks

1. The lifting capacities stated are valid for lifting operation only (corresponds with crane classification according to F.E.M. 1.001, crane group A1)
2. Crane standing on firm, horizontal ground.
3. The weight of the lifting device (hoisting ropes, hook block, shackle etc.) must be deducted from the gross lifting capacity to obtain a net lifting value.
4. Additional equipment on boom (e.g. boom walkways, auxiliary jib) must be deducted to get the net lifting capacity.
5. For max. wind speed please refer to lift chart in operator's cab or manual.
6. Working radii are measured from centre of swing and under load.
7. The lifting capacities are valid for 360 degrees of swing.
8. Calculation of stability under load is based on DIN 15019 / part 2 / chart 1 and ISO 4305 Table 1 + 2, tipping angle 4°.
9. The structures are calculated according to F.E.M. 1.001 – 1998 (EN 13001–2/ 2004).
10. ANSI B 30.5

Transport dimensions and weights

Basic machine and boom (No. 2220.xx)

Basic machine

with A-frame, 2x 66,200 lbs winches including wire ropes (492 ft), without crawlers, boom foot, basic and carbody counterweight.

Width _____ 11'6"

Width	12"
Weight in lbs	2,150

66,150 lbs single hook

Width	16"
Weight in lbs	880

Technical description

Engine

Power rating according to ISO 3046 IFN, 670 kW (898 hp) at 1900 rpm
Engine type ——— MAN D 2842 LE
Fuel tank ——— 264 gal capacity with continuous level indicator
——— and reserve warning
Engine complies with NRMM exhaust certification EPA / CARB Tier 2.

Hydraulic system

The main pumps are operated by a distributor gearbox. Axial piston displacement pumps work in closed and open circuits supplying oil only when needed (flow control on demand). To minimize peak pressure an automatically working pressure cut off is integrated. This spares pumps and saves energy. The hydraulic oil is cleaned through electronically controlled pressure and return filters. Possible contamination is signaled in the cabin. The use of synthetic environmentally friendly oils is possible.
Ready made hydraulic retrofit kits are available to customize requirements e.g. powering casing oscillators, VM-vibrators, hydraulic grabs, hanging leads etc.
Working pressure ——— max. 5076 PSI
Oil tank capacity ——— 290 gal

Boom winch

Line pull ——— max. 33,100 lbs
Rope diameter ——— 24 mm
Boom up ——— 137 sec. from 15° to 86°

Swing

Consists of rollerbearing with external teeth for lower tooth flank pressure, fixed axial piston hydraulic motor, spring loaded and hydraulically released multi-disc holding brake, planetary gearbox and pinion.
Swing speed from 0 – 3.6 rpm continuously variable, selector for 3 speed ranges to increase swing precision.

Standard:
Second swing drive
Optional:
Third swing drive

Noise emission

Noise emissions correspond with 2000/14/EC directive on noise emission by equipment used outdoors.

Main winches

Winch options:
Line pull (nom. load) ——— 66,200 lbs
Rope diameter ——— 36 mm
Drum diameter ——— 32.7"
Rope speed (ft/min) ——— 0–252
With change gear box (ft/min) ——— 0–515
Rope capacity 1st layer ——— 180 ft

The winches are outstanding in their compact design and easy assembly. Clutch and braking functions on the free fall system are provided by a compact designed, low wear and maintenance free multi-disc brake. The drag and hoist winches use pressure controlled, variable flow hydraulic motors. This system features sensors that automatically adjust oil flow to provide max. winch speed depending on load.

Option:

Crane winch (main winch) ——— 33,100 lbs with multi-disc holding brake
Auxiliary winch ——— 15,500 lbs in boom foot
Tagline winch ——— 15,500 lbs with free fall
——— 6,600 lbs with free fall

Crawlers

Propulsion through axial piston motor, hydraulically released spring loaded multi-disc brake, maintenance free crawler tracks, hydraulic chain tensioning device.

Flat track shoes ——— 43.3 inch
Drive speed ——— 0 – 0.8 mph

Option:

- 2 speed hydraulic motor for higher travel speed
- Self assembly system, jack up system

Control

The control system – developed and manufactured by Liebherr – is designed to withstand extreme temperature changes and the rough heavy duty tasks common in the construction industry. Complete machine operating data are shown on a high resolution display. The crane is equipped with proportional control for all movements, which can be carried out simultaneously.

Dragline operation: A special "Interlock" control system is an option available. It is designed for power lifting of the dragline bucket without using the drag winch brake.

An additional option is the "Redundant Control System", which allows restricted operation of the machine in the event of a failure on the electronic base control or its sensors.

On request, Liebherr also offers special custom designed control systems for free fall winches.

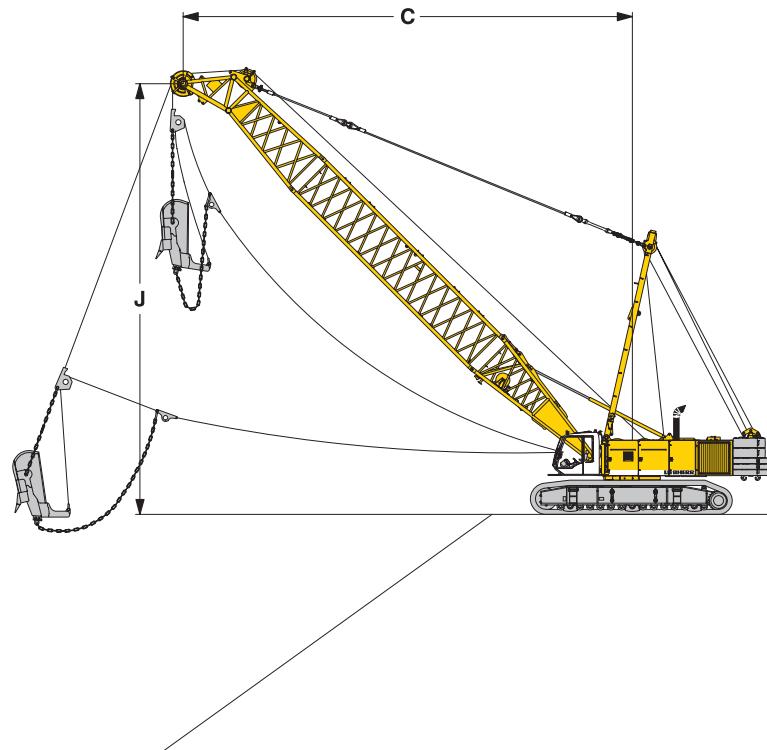

Operation: Left joy stick for boom winch and swing, right two directional levers for winch I and II. Crawler control is actuated with the two central foot pedals. Additionally, hand levers can be attached to the pedals.

Options:

- Special demolition control system
- MDE: Machine data recording
- PDE: Process data recording
- GSM modem

Dragline equipment

121,500 lbs counterweight

Max. capacities in 1000 lbs do not exceed 66.7 % of tipping load.

Load diagram restricted by safety factors of standard ropes:

Winches _____ 66,200 lbs

Rope diameter _____ 36 mm

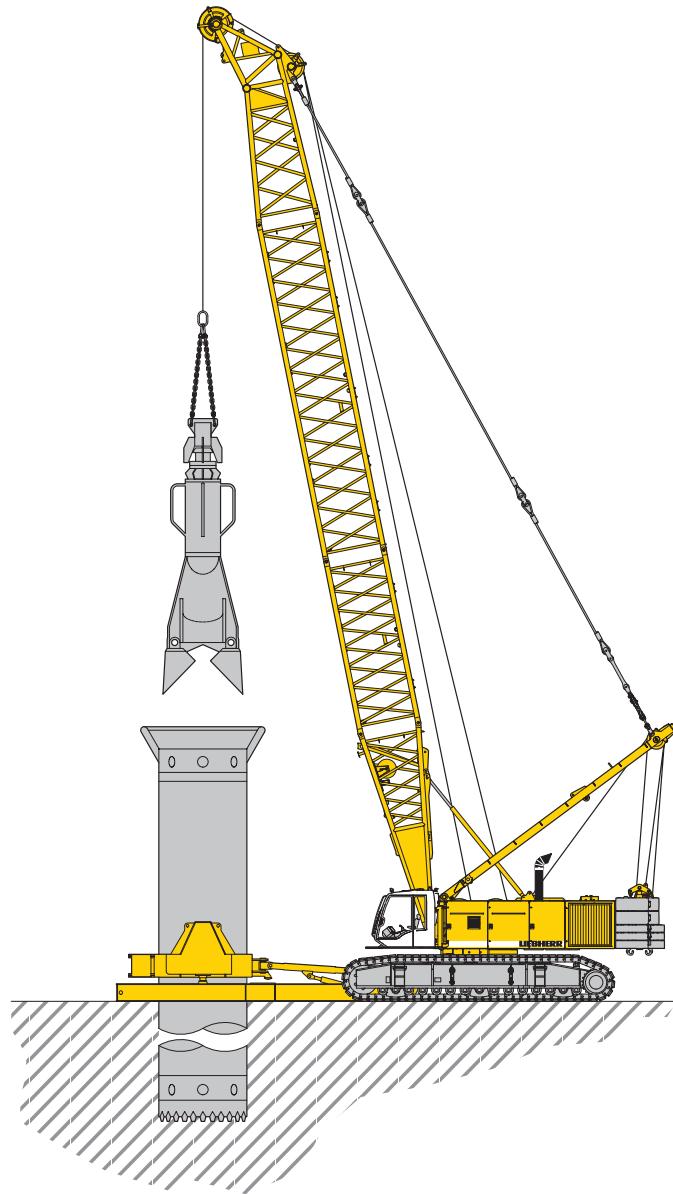

Calc. breaking load — 260,550 lbf

1-rope clamshell — 51,800 lbs

2-rope clamshell — 69,000 lbs

Equipment

Casing oscillator

Winch options	2 x 66,200 lbs
Line pull 2 x	132,300 lbs
Max. rope speed 1st layer (with change gear box)	0-253 ft/min 0-515 ft/min
Drilling diameter	10.8 ft
Max. chisel weight	39,700 lbs
Max. capacity with boom position in longitudinal direction of undercarriage with 104 ft main boom at 33 ft radius (75% tipping load)	168,900 lbs

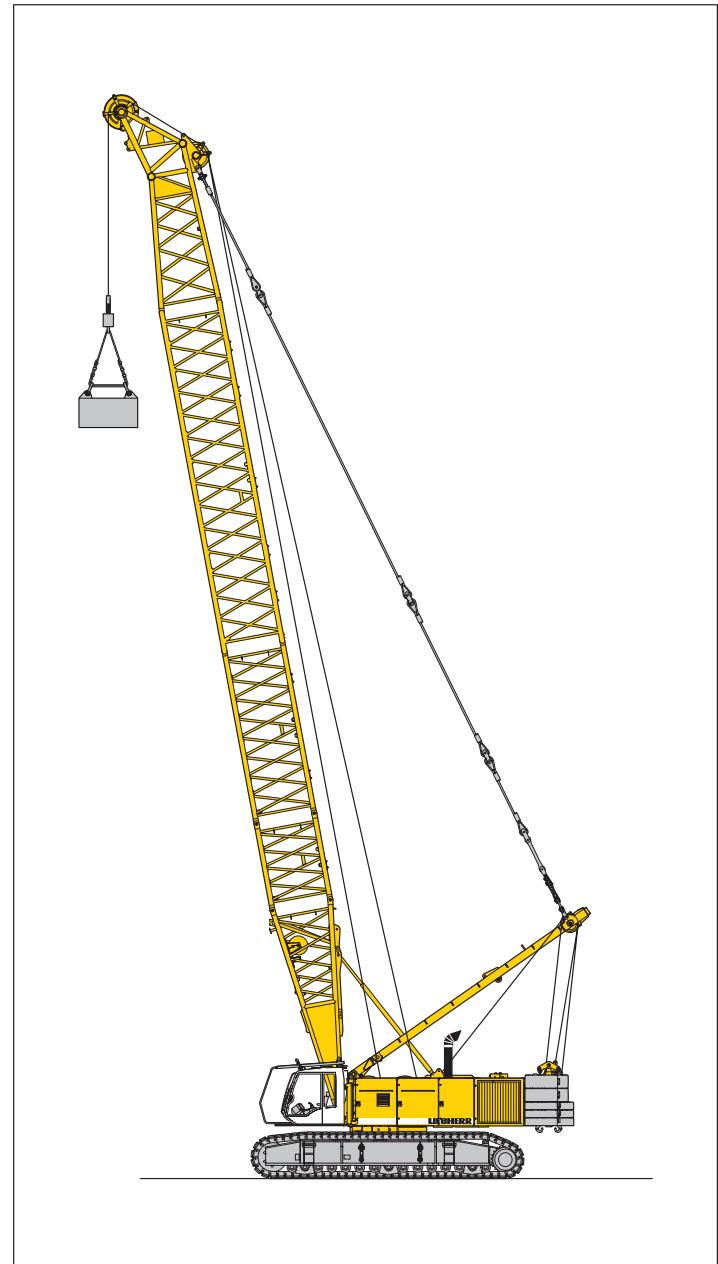

Free fall winches with maintenance free, spring loaded multi disc brake working in an oil bath. Simultaneous working of both winches is assured through our hydraulic system.

Hydraulic supply for casing oscillator
 $q = 2 \times 106 \text{ gal/min}$.
 $P = 4350 \text{ PSI max}$.

Mechanical connection casing oscillator on undercarriage.
Automatic operation for one and two rope grabs (optional). During the drilling process the engine power can be freely divided between casing oscillator and hoisting winches as required.

Equipment

Dynamic soil compaction

Capacities in 1000 lbs for boom lengths (84 ft – 142 ft)

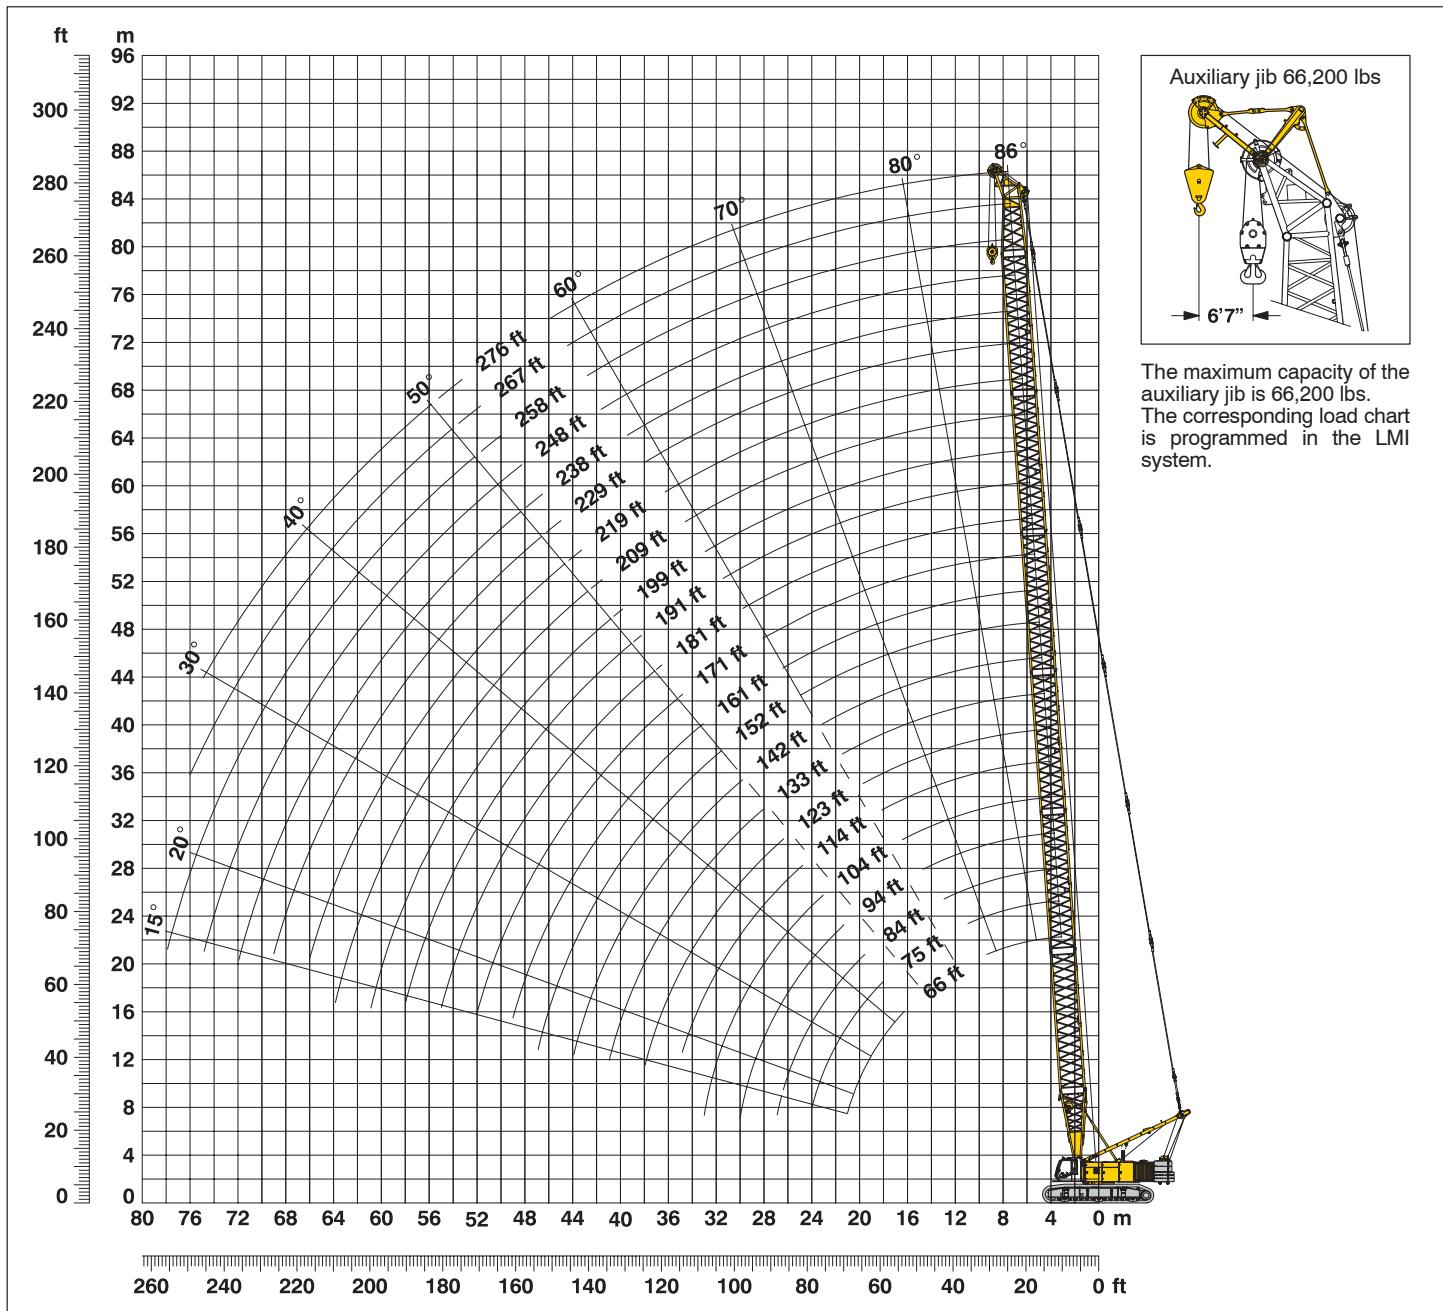

Radius (ft)	Boom length			
	84 ft lbs	104 ft lbs	123 ft lbs	142 ft lbs
29.5	88,2	88,2	88,2	83,8
32.8	88,2	83,8	79,4	75,0
36.1	77,2	77,2	70,6	68,4
39.4	70,6	70,6	66,2	61,7

Max. capacities in 1000 lbs do not exceed 75% of tipping load.

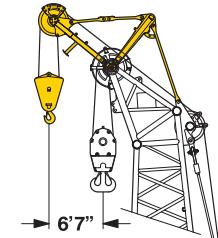

All loads given are max. values and must not be exceeded. They are only permitted in two rope automatic operation and are valid for work on a surface with max. inclination of 1 %. Lifting heights must not exceed 98.4 ft.

Working range - main boom (No. 2220.xx) 86° - 15°

166,000 lbs counterweight and 59,500 lbs carbody counterweight

Auxiliary jib 66,200 lbs

The maximum capacity of the auxiliary jib is 66,200 lbs.
The corresponding load chart is programmed in the LMI system.

Main boom configuration (table 1 – No. 2220.xx)

Configuration for boom lengths (66 ft – 276 ft)

	Length	Amount of boom extensions																					
Boom foot	23 ft	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1
