Liebherr Transform

Unleash the full potential

Liebherr Transform maintains your machine in its original top form through complete or partial machine overhauls. It helps you to keep ahead of changing demands due to stipulations or evolving market demands through a wide range of upgrades. It brings the latest technologies to your existing Liebherr machines thanks to innovative retrofits. Liebherr Transform makes your machine stronger, faster, smarter, greener, and ultimately... better.

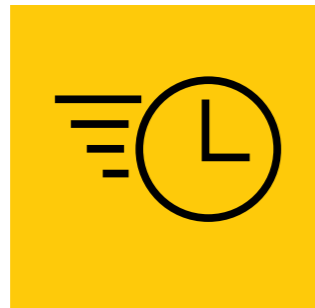

The demands on businesses are growing continuously and the pressure to become even better increases by the day. New technologies and applications are being introduced and have to be pieced together to form a whole new approach to daily procedures. Liebherr Transform provides you not only with the technologies but also the coordination and best solution to find the most suitable and economic answer for your requirements and, at the same time, make your machine fit for the future. And all that in original manufacturer quality.

With Liebherr Transform, your equipment achieves:

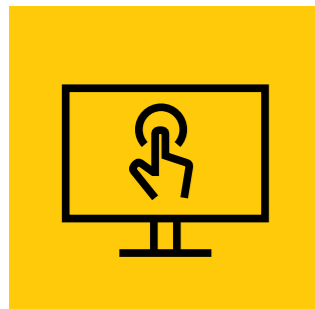

- reduced environmental impact
- increased performance and higher flexibility
- an extended machine service life
- improved operational safety

Overhauls

To restore and enhance the productivity of your crane, we offer overhauls of individual components, customized packages, or complete crane overhauls. The scope depends on your needs and is planned individually. All overhauls can be carried out as an all-round carefree package at your site.

Upgrades

Starting with on-site consulting and demand planning through to actual installations, we are at your side as a strong solution partner. We offer a wide range of upgrades to ensure your machine continues to meet all the requirements of new legislation and standards, and also to maintain high versatility to compete on the jobsite of the future.

Retrofits

We provide many retrofits designed to make your machine more economical, to significantly improve performance, and to make life easier for you and your employees. These systems have been developed by Liebherr following decades of technological experience and in response to your requirements.
